REMARKS

Claims 10, 11, 14-21, 23, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The Examiner states that the term "free edge" is not supported by the specification. The term "free edge" is found on page 6, line 24 of the application as originally filed. The specification states that the "the exterior sheeting 14 serves as the closing element for an adequately large access opening 22, formed at the free edge of the essentially pot-shaped or tub-shaped interior sheet metal." As shown in the attached dictionary definition from the website www.m-w.com, the term free means "not fastened." A "free edge" of the interior sheet metal is the edge of the interior sheet metal that is not connected to anything, and is therefore "free" and able to form the access opening. That is, the free edge of the interior sheet metal is not fastened to any other component and can therefore define the access opening. The claimed invention is definite.

Claims 10, 11, 23 and 25-28 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Szerdahelyi. Szerdahelyi does not disclose an access opening formed at a free edge of an interior sheet metal. In Szerdahelyi, a vehicle door includes a cutout opening 10 in an inner door panel 1b (Figure 1a). The cutout opening 10 is not formed at a free edge of the interior door panel 1b. Instead, the cutout opening 10 is formed in a central portion of the interior door panel 1b. The central portion of the interior door panel 1b is not located at the edge of the door and is certainly not located at the free edge of the vehicle door. Szerdahelyi does not disclose an access opening formed at a free edge of an interior sheet metal as claimed. The claimed invention is not anticipated, and Applicant respectfully requests that the rejection be withdrawn.

Claims 27-29 are also not anticipated by Szerdahelyi. Szerdahelyi does not disclose a carrier module including a window lift mechanism that closes an opening of a closing plate that closes an opening to an access opening. In Szerdahelyi, a window lift mechanism 31 is mounted to a module support 3 (column 3, lines 36 to 38). A manual operating unit 5 and a side airbag 6, which the Examiner is calling the carrier module, are also assembled on the module support 3. The window lift mechanism 31 is not carried by the manual operating unit 5 and the side airbag 6, but is carried by the module support 3. Szerdahelyi does not disclose a carrier module including a window lift mechanism that closes an opening of a closing plate that closes an opening to an access opening as claimed. The claimed invention is not anticipated.

60130-899
OOMRA0028

Claims 14-21 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Szerdahelyi in view of Carlo. The Examiner states that it would be obvious to provide the carrier module with two guide rails and a brace in Szerdahelyi because of Carlo. Applicant respectfully disagrees. Claims 14-22 and 24 depend on patentable independent claim 10 and are allowable for the reasons set forth above. Adding Carlo to Szerdahelyi still does not disclose, suggest or teach the claimed invention because neither of the references disclose an access opening formed at a free edge of an interior sheet metal. The Examiner states that the Board of Appeals has stated that the combination is reasonable. However, neither reference discloses an access opening formed at a free edge of an interior sheet metal, and therefore the combination of the references does not disclose, suggest or teach the claimed invention. This feature was not presented in the claims before the board. The claimed invention is not obvious, and Applicant respectfully requests that the rejection be withdrawn.

Thus, claims 10, 11, 14-21, 23 and 25-29 are in condition for allowance. No additional fees are seen to be required. If any additional fees are due, however, the Commissioner is authorized to charge Deposit Account No. 50-1482, in the name of Carlson, Gaskey & Olds, P.C., for any additional fees or credit the account for any overpayment. Therefore, favorable reconsideration and allowance of this application is respectfully requested.

Respectfully Submitted,

CARLSON, GASKEY & OLDS, P.C.

- free-ness ⁴ /-nēs/ *noun*
- for free : without charge
synonyms FREE, INDEPENDENT, SOVEREIGN, AUTONOMOUS mean not subject to the rule or control of another. FREE stresses the complete absence of external rule and the full right to make all of one's own decisions <you're *free* to do as you like>. INDEPENDENT implies a standing alone; applied to a state it implies lack of connection with any other having power to interfere with its citizens, laws, or policies <the colony's struggle to become *independent*>. SOVEREIGN stresses the absence of a superior power and implies supremacy within a thing's own domain or sphere <separate and *sovereign* armed services>. AUTONOMOUS stresses independence in matters pertaining to self-government <in this denomination each congregation is regarded as *autonomous*>.
